PROFESSIONAL SUMMARY

Motivated Bachelor of Science in Information Technology (BSIT) student with hands-on experience in full-stack web development, database management, and software engineering. Skilled in React.js, Node.js, Django, Express.js, PostgreSQL, SQL, RESTful API development, and Agile Scrum software development practices. Experienced in designing responsive web applications, implementing authentication systems, developing role-based information systems, and collaborating in iterative development cycles. Knowledgeable in Geographic Information Systems (GIS), AutoCAD, cybersecurity fundamentals, and 3D modeling using Blender. Passionate about building reliable, user-friendly, and scalable software solutions.

EDUCATION

2015 – Present

CARAGA STATE UNIVERSITY – Main Campus Butuan City, Philippines Bachelor of Science in Information Technology (BSIT)

EXPERIENCE

Thesis Management System Developer (React.js, Node.js, Django, PostgreSQL) 2023

- Developed a full-stack thesis management system with role-based access for students, faculty, advisers, and administrators.
- Designed dashboards, authentication systems, and thesis tracking workflows.
- Designed and managed PostgreSQL databases using SQL queries, relationships, and database normalization techniques.
- Implemented RESTful APIs and integrated PostgreSQL databases with backend services.
- Developed responsive user interfaces using React.js, Tailwind CSS, and Shadcn UI.
- Collaborated on system architecture, testing, debugging, and feature enhancements.

User Management System Developer (React.js, Express.js, PostgreSQL) 2023

- Built CRUD functionalities for user creation, updating, deletion, and authentication.
- Developed SQL queries for efficient data retrieval and database management.
- Connected frontend interfaces with backend REST APIs.
- Improved database performance and implemented role-based user access control.

Web Security Activity (Burp Suite, bWAPP) 2023

- Demonstrated command injection vulnerabilities and mitigation techniques.
- Intercepted, analyzed, and modified HTTP/HTTPS requests using Burp Suite.
- Applied secure coding principles through practical web security exercises.

LEADERSHIP & TECHNICAL ACTIVITIES

- Participated in full-stack software engineering projects using Agile Scrum methodology.
- Conducted database design and normalization activities.
- Performed Geographic Information Systems (GIS) and Remote Sensing laboratory exercises.
- Created engineering drawings and technical designs using AutoCAD.
- Participated in cybersecurity and web security demonstrations.
- Collaborated in software development using Git and GitHub version control.

TECHNICAL SKILLS

- Programming: JavaScript, Python, SQL
- Frontend: React.js, Tailwind CSS, Shadcn UI
- Backend: Node.js, Express.js, RESTful APIs
- Database: PostgreSQL, SQL, Database Design, Normalization, CRUD Operations
- AI & Automation: n8n, AI Agents, Workflow Automation, Webhooks, API Integration, AI-powered Chatbots
- Development Methodology: Agile Scrum, Software Development Life Cycle (SDLC)
- GIS & Engineering: GIS, QGIS, ArcGIS (Basic), AutoCAD
- Cybersecurity: Burp Suite, bWAPP, Web Application Security Testing
- Tools: Git, GitHub, Blender, Microsoft Office (Word, Excel, PowerPoint)

TRAININGS

- Web Application Security Hands-on Training
- Agile Scrum Software Development Workshop (if applicable)
- Burp Suite Request Interception and Analysis Workshop
- Full-Stack Web Development Practice Projects
